

Department of Defense Information Analysis Centers (DoD IAC)

Who We Are: For over 71 years, the DoD IACs have proven to be an essential tool for discovering and delivering superior warfighting capabilities, by providing comprehensive scientific and technical research and analysis, helping researchers, engineers, scientists, and program managers solve the most challenging technical problems.

Who We Serve: With more than **200+** active technical area tasks (TATs) in FY17, the DoD IACs currently support all the military services, OSD, service labs, and the Combatant Commands (CCMDs).

In FY17 the IACs served over **500** DoD users.

Over \$1.45 billion in actual work in FY17:

FY17 DoD IAC Funding By Organization

IACs Provide Increasing Value:

“A Case Study for Better Buying Power” report by the Center for Strategic & International Studies (CSIS) found that, under the new strategic sourcing model:

IACs “will be positioned to create and sustain a focus on the Better Buying Power Initiative to improve affordability, productivity, and standardization within defense acquisition programs.”

Pentagon spokeswoman indicated that:

“IACs serve as a proven resource for maximizing the value of each dollar the Department spends... in this time of budgetary uncertainty, the importance of DoD’s IACs is actually enhanced.”

New contract value exceeding \$3 billion in FY17

DoD IACs provide technology discovery capabilities and an efficient mechanism to acquire affordable, improved defense capabilities that mitigate adversarial threats and deploy swiftly to the Warfighter.
